

2018-2019 Antlerless Deer Harvest Policy

- A maximum of 25 antlerless (doe) deer will be allowed to be harvested. When a hunter has successfully harvested one (1) antlerless deer, that hunter is no longer eligible to participate in antlerless deer hunting on the Installation. Daily bag limits shall be in accordance with Alabama Game Law. Once the antlerless quota has been met, the quota hunt will be declared over. Any antlerless deer taken in addition to the quota will be in violation of Fort Rucker regulations and the hunter will be subject to citations and loss of hunting privileges. The status of the quota harvest will be posted on ISportsman and updated daily.
- All antlerless deer harvested must be recorded on both iSportsman and Alabama DCNR Game Check. Failure to do so will result in fines and possible loss of hunting privileges.
- Only Active duty personnel and their families will be allowed to participate in the antlerless quota hunt.
- The antlerless deer season (firearms and/or archery) will begin on December 16, 2018 and end on January 1, 2019. (This is in accordance with Alabama State Hunting Regulations/law.)
 - There will be a one day YOUTH ONLY antlerless deer hunt on Saturday December 15, 2018. This hunt should be open and available to all youth rather than Active Duty affiliated only.
 - The Installation will be divided into two (2) antlerless deer hunting zones and each zone will have its own quota.
 - Zone One (1) will encompass those hunting/training areas that are north of State Highway 27. The allowable quota in this zone is fifteen (15) antlerless deer.
 - Zone Two (2) will encompass all training/hunting areas south of State Highway 27. The allowable quota for this zone will be ten (10) antlerless deer.
 - The availability of the training/hunting areas in these zones to be open is determined by Range Control.
 - In the event that the antlerless quota is not met during the antlerless season (Dec. 15, 2018-Jan. 1 2019) a special archery only season will be implemented that would tentatively begin January 5, 2019 and end on February 10, 2019 or earlier if the quota is met.
 - It is the responsibility of each individual hunter to monitor ISPORTSMAN on a daily basis to identify the open or closed status of antlerless harvesting.
 - BUCK HARVEST – 1 Buck per day, 3 points on one side minimum, 2 each per season maximum

Antlerless Deer Harvest FY 18/19

-  Hwy 27
-  Quota: 10 Antlerless Deer
-  Quota: 15 Antlerless Deer
